ABOUT THE EVENT

In a time where the entire world is faced with the combined challenges of a global economic recession, coupled with a deadly pandemic, the quick cure to both of which seem nowhere in sight, perhaps it's time we pause and take a look at our society and our systems. The challenges revolving around placement are worth looking at, considering the future prospects of all students who aspire for a job. Gender biases are deeply engrained in our societal systems and hierarchies. It is a burning issue that requires the attention and action of you, the youth. These are indeed stressful times, and the world requires healthy minds to carry humanity forward, ahead of problems that hinder us. The sphere of mental health commands our immediate attention, now, more than ever. Therefore, this might be the best time for all of us to come together, understand deeply, discuss, and optimise solutions to these problems. Making this conference the need of the hour!
